

## WindowCentrics

Design your home from the windows out.

### throughout the day.

**1** Sunlight is an essential architectural tool. Use it well -- with careful window choice and placement -- and transform an interior as the sun moves through the day.

## Channel fresh air

**2** Proper ventilation is more sophisticated than opening a window or two. For example, use roof and wall windows to funnel warm air outdoors or place windows on opposing walls to channel air throughout your home.

## Control the view.

**3** With the right window or patio door positioning, spectacular scenery can be the focus of a room or even the entire home. A huge picture window or a perfectly aligned group of smaller windows celebrate a home's surroundings.

## A better replacement solution.

Looking to replace your windows or patio doors? Our full range of beautifully crafted, energy-efficient, low-maintenance products are the perfect solution for your project.

## Which window is right for you?

**Insert replacement windows** allow you to get the latest window performance features while preserving the original frame, exterior trim and interior casing

## Maximize your options with full-frame replacement windows.

Andersen now brings you more full-frame replacement window solutions that go well beyond standard sizing. Full-frame replacement windows mirror new construction installations. The entire window frame and sash are removed, resulting superior weather tightness and often greater glass viewing area.

Whether it's a double-hung, casement, awning or specialty window, you'll find it easier than ever to find the perfect window for your remodeling or replacement project.
